

Abstract

**Wir Gegen Corona Initiative  
A Platform for Cooperation, Solidarity and Cohesion  
in the Time of Coronavirus**

by Jennifer Schmid

The corona virus has changed life in Germany and restricted it in many areas. In this so unclear and insecure situation, solidarity also became increasingly important. Everywhere in Germany people are helping each other to get through the Corona crisis. Many actions are initiated, neighbors support each other by doing the shopping or by going for a walk with the neighbor's dog. One example is the "We against Corona" initiative, which I helped to develop. Using Martha Nussbaum's Capabilities Approach, this report aims to show which capabilities have been strengthened by the initiative.
