

1. Abstract

The project aims to empower citizens by making the knowledge of one's rights more accessible to people. Specifically it focuses on situations in which individuals are stopped by the police and are potentially unsure about their rights and obligations. By designing a website with information people can inform and empower themselves. Additionally, the project has designed compact cards that people can carry in their wallets or handbags to make the most important information more easily available during such situations. Furthermore, there was a particular focus on people who do not speak German as their first language. The information provided was translated into 7 other languages, thus making it accessible for a larger group of people and allowing non-native speakers to try and overcome their disadvantage in these situations.
