What is important in early childhood education in Germany?

"ECE in Germany – Professional Learning Resources" offers expertise on a wide variety of professional learning themes. In doing so, we are responding to a broad international interest in the underlying philosophies, concepts and methods of early childhood education and care in Germany. The website boosts the international visibility of the German early childhood education landscape, including the basic approaches to education and discussions on the latest topics.

Our selection of study texts in English is unique. Starting in 2019, a number of study texts originally published in German on www.Kita-Fachtexte.de are available in English on www.ece-in-germany.info.

The papers are openly accessible and can be downloaded for free as a PDF. There are more papers to follow!

The resources...

- are prepared for the education, training and professional development of early childhood professionals.
- contribute to their reflective practice.
- explore a wide variety of topics in question.
- are practice-oriented.
- correspond to scientific standards.
- discuss the results of empirical studies.
- encourage further reading with literature recommendations.

Topics

- Child development
- Quality development, evaluation and research
- Educational concepts
- Observation and documentation
- Children's first three years of life
- Collaborative partnerships with families
- Early childhood profession
- Daily routines in early childhood education
- Early childhood education in an international context
- Inclusive pedagogy
